

Capital Administrators, LLC

(A Division of the 5 Cees Companies)

Was created in the 1980's to provide Third Party Administrative services for cafeteria and 105 plans for the small to larger businesses at competitive rates. Capital Administrators, LLC (CAL) added services for pension plans such as defined benefits, 401K, SEP, Simple, solo 401K, 403B, IRA's and other programs.

They are one of the few independent TPA's left in the country as the large mutual funds, banks and brokerage firms formed or bought out many of the independent firms. These TPA's sell products making it a double edge profit maker for them and have control of their client's investment by only offering limited choices usually products they own or control. Being the custodian they have that option.

Congress has stepped in and new law that goes into effect in July, 2012 makes administrators put in writing their fees, commissions and other charges as manager and custodian of their TPA accounts.

In 2002 we started offering our management fees for clients with IRA accounts by use of "Self Directed IRA's" (SDI) and it is a booming market for IRA/Pension accounts wanting more diversification than they received from their prior custodians. To do that the client must roll their existing account to a new custodian that is an approved SDI custodian. This now opens the door to a giant selection of investments they couldn't purchase before and it's almost limitless to selection. We've seen returns of 20% per month and some even larger by using a SDI.

CAL offers management services for today's IRA owner and does a complete turnkey program for them. All they do is provide us some basic information and we do the rest. Then the client can shop for investments or if they want help we know of respected advisors we refer them to whether real estate, securities, art, special medicals or...

Our sister company Capital Concepts, Inc provides continued educational schools to educate your CPA, Attorney, Realtor or investment advisor on SDI's and how they work.
